SURVEY NARRATIVE

The purpose of this survey was to mark the boundary and parcels of the partition shown on the annexed map. A sectional breakdown was necessary to accomplish said marking. All section and 1/4 section corners needed to initiate the breakdown were found as per Dependent resurvey of Section 6 by White & Jolley - 1961 (Given of Land Management). Record and measured values agreed favorably well. No unusual conditions were encountered. Bearings are based on the North line of Section 6 (Township line) as per said resurvey. Field work on this survey was completed on Oct. 11, 1990.
