NOTE:
We drove 6 ft. long galvanized steel fence posts alongside each right of way pin set, where practical.
The section and section subdivisional lines shown are protracted for general information only.

NARRATIVE: This survey was performed at the request of Jim Walker, Assistant County Road Supervisor. The purpose of this survey was to delineate an area for a proposed rock quarry and a crushed rock storage site lease. Also, we were to locate the existing access roads leading from this site to County Road No. 76.

A search was made of the available records pertaining to this survey. Field measurements were made to locate the existing access roads and the NW corner of Section 32, which I remonumented from original evidence in 1973. New monuments were set at locations approved by Mr. Walker and Bill Towell, the land owner, as shown hereon. I found no unusual conditions during this survey.
