

BASIS OF BEARINGS
SOLAR OBSERVATION
 Taken at the SW Corner of Microwave Site

LEGEND

- Found 2-1/2" iron pipe with attached 3" brass cap, see corner restoration records.
- Set 5/8"x30" iron pin with attached yellow plastic cap marked BGA SURVEY MARKER.

NARRATIVE:
 This survey was performed at the request of Don Malmstrom of Affiliated Land Services, Inc., acting in behalf of PTI Communications. The purpose of this survey was to set four corners of a microwave tower site and tie the southwest corner of that tract to the NW corner of Section 6, as shown hereon.

A search was made of the available records pertaining to this survey. Field measurements were made to locate the existing monument at the NW corner of section 6. The NW corner of section 6 was remonumented from original evidence in Nov. 1972 by D.M. Ferguson, PLS No. 848. We set new monuments at corners of the microwave site as instructed by Don Malmstrom and PTI Communications, as shown hereon.

During this survey, we ran a closed loop traverse to tie the section corner and to set new monuments at the site.

I found no unusual conditions with this survey.
