

# NARRATIVE

This survey was performed at the request of the Grant County Road Department. The purpose of which is to define and monument the right of way on a portion of County Road #24. This survey commenced in June of 1997 and was completed in January of 1998.

In order to perform this survey, a search was made for all pertinent surveys, maps of survey, and deed descriptions (see references). A closed control traverse was ran and Public Land Survey corners (including adjacent Mineral Survey corners) in the immediate vicinity were tied as shown. It is found that Government Lots have been created in Sections 2, 3, 10 & 11, T.9S., R.35E., W.M., due to fractional areas resulting from various Mineral Claim Surveys.

The portion of this project from centerline station 0+00 to 50+77.20 is a proposed alignment over unimproved ground. Right of way is located which accommodates that proposed alignment, construction cuts and fills and improvements.

From station 50+77.20 to 231+62.34, the existing roadway was field tied and centerline geometry was created as shown to accommodate this roadway. Right of way was located to accommodate the existing roadway and cut and fill slopes.

There are 12 separate ownerships effected by this survey. Such ownerships are referred to as Parcels 1 through 12 on this map and accompanying legal descriptions.
