Re: Review of Corner Evidence

This report describes my review of corner evidence for the following corners requested by Douglas Ferguson PLS, 848:

- (A) Corner common to Sections 34 and 35 T.12S., R.30E. and Sections 2 and 3 T.13S., R.30E., W.M.
- (B) Corner common to Sections 2, 3, 10, and 11, T.13S., R.30E.
- (C) Corner common to Section 12 & 13 T.13S., R.30E., and Sections 7 and 18 T.13S., R.31E.
- (D) Corner common to T.12 and 13S., R.30 and 31E.
- (E) 1/4 Corner common to Section 32, T.12S., R.31E. and Section 5, T.13S., R.31E.

Doug Ferguson performed the Hencock Cadastral Survey under contract with the U.S. Forest Service in October 1981- May 1983, filed as Record Map of Survey No. 785. During this survey Doug set about 120 monuments in T.12S., R.30E., and T.12S., R.31E.

Several private surveys have been done in this township since then. These surveys have relied on the monumentation of corners as set in Survey No. 785.

On June 7th, 2001, Jack Watson, PLS 2734, offered a map of survey and corner restoration sheets for filing with this office. He said he disagreed with corners set by Doug in Survey No. 785 and told me he found three corners that Doug had missed.

I called Doug Ferguson on June 9th and told him Jack Watson had submitted a map of survey for filing and that he disagreed with Doug's Survey No. 785. I made him a copy of the map and corner restoration sheets for his review and comments.
