## **SURVEYOR'S NARRATIVE:** Set Monument Marking Detail RECORD of SURVEY for For Corners Set See Certificates Filed Separately This survey was performed for the Morrow County Parks Department to establish the boundaries of their property purchased in 2007 that would become The Morrow County OHV Park. Prior to my completing the survey Grant County was able to acquire property adjacent to this to be included in the boundary of the park, thus becoming the Morrow/Grant County OHV Park. Morrow County Public Works Dept. I was the Morrow County Surveyor when I started the survey and have completed it after leaving that office. the project was partially funded by the Oregon Parks & Recreation Department T6S R26E T6S R26E through the proceeds from sales of ATV permits. As a part of the funding for the purchase and development of the Park, a survey was required to ensure that users of the park were aware T6S R26E T6S R26E T6S R26E of the park boundaries and did not leave the park unknowingly and trespass upon an adjacent landowner. The County expected to post and fence their boundary and completed that task Morrow/Grant County OHV Park within a couple of years of obtaining the property about 2010. Where practical and convenient, the County left small portions of their property outside the fences to avoid extra road crossing 3<u>2|3</u>3 31 32 32 33 T7S R26E and also to appease adjacent landowners. A portion of this survey was also funded by the County Monumentation funds through the County Surveyors office as a good share of the park South Morrow County, Oregon T7S R26E T7S R26E T7S R26E boundary was also a retracement of the GLO Survey that was completed by E.W. Sanderson in 1881. The property was previously owned by the Kinzua Timber Company and a lot of the PLS 2431 PLS 2431 PLS 2431 2013 PLS 2431 2013 PLS 2431 2014 PLS 2431 Township 6 South, Range 25 E. & 26 E., Willamette Meridian evidence of the section lines and corners was posted by Kinzua employees. The Kinzua employees were not licensed surveyors, that I am aware of, and the information that they left in the 2014 field was helpful but in most cases not accurate. In some cases the Kinzua information was all that was available for a given corner and I did not monument or show record of any of these corners. In following Sanderson's survey notes I was able to resurrect a lot more GLO survey evidence than I originally found when I started the survey. Now that the survey is complete, I can LEGEND Monument say that all of the exterior boundaries of the Park that are a GLO section lines or corners that have been monumented by me, were done using Original GLO evidence from Sanderson's 1881 Monument Description Found Section Monument as Described survey or by York's survey of 1880 for the Township to the South. Other portions of the Park Boundaries were completed either prior to or during my survey and are listed in the referenced T6S R26E T6S R26E 3 1/4" Alum. Cap, South Quarter Corner, Sec. 34, 6S 25E, PLS 1832, 1984, C.S.#C-846-K County Survey Records below. I should note the following where this survey does not agree with previous surveys: 1/4 Found Monument as Noted 3 1/4" Alum. Cap, Section Corner, Sec. 3-2, 7S 25E, PLS 1832, 1984, C.S.#C-846-K In Wells' survey around the boundary of Section 36, Wells set and marked Corner #36 as the East Quarter of Section 36. Sanderson did not set the East Quarter corner of Section 36, as shown by his records, so the evidence that Wells found was actually the West Quarter of Section 31. Kinzua left evidence of it being the Section 36 Quarter and they also left evidence of the Section 31 2 5/8" Brass Cap, Section Corner, Sec. 34-35, 6S 25E, PLS 1679, 1980, C.S.#C-434-K Set Section Monument as Described Quarter being located to the South but that cannot be the case based on Sanderson's field notes. 2 5/8" Brass Cap, North Quarter Corner, Sec. 2, 7S 25E, PLS 1679, 1981, C.S.#C-434-K PLS 2431 2013 PLS 2431 In Delano's survey of Sections 4 & 5 of Township 7 South, Range 26 East he set the North Quarter corners for both of those Sections. In Section 4, he identified a Line Tree and used proportion PLS 2431 Survey Boundary Line 2 5/8" Brass Cap, South Quarter Corner, Sec. 35, 6S 25E, PLS 1679, 1980, C.S.#C-434-K to set the corner. I believe the Line Tree to actually be a Bearing Tree as described by York. I also found evidence that matches the other Bearing Tree and the Line Tree where the geometry of 2013 Monument Found/Set & Description all of that evidence matches York's notes. I set a new monument based on the found evidence. The location of that corner matches the old possession lines as witnesses by the past logging 2 5/8" Brass Cap, Section Corner, Sec. 1-2, 7S 25E, PLS 1679, 1981, C.S.#C-434-K activities and the testimony by the adjacent private landowner. 2 5/8" Brass Cap, Section Corner, Sec. 35-36, 6S 25E, PLS 1679, 1981, C.S.#C-434-K Calculated Point -Not Set At the North Quarter of Section 5, I projected the found bearing from the Section corner common to 31 & 32 through a found Line Tree just west of Delano's cap. I found a stone that matched 2 5/8" Brass Cap, North Quarter Corner, Sec. 1, 7S 25E, PLS 1679, 1981, C.S.#C-434-K the Dimensions, the Line, and the Distance exactly as described in York's field notes. I found all of those traits too compelling to dismiss it as the actual corner. I therefore set a new cap at that GLO Record Distance/Bearing Contract #368 2 5/8" Brass Cap, South Quarter Corner, Sec. 36, 6S 25E, PLS 1679, 1981, C.S.#C-434-K location in very close proximity to the found cap that Delano set by proportion. I also found a mound of stone and a tree scribed with a 1/4 mark in addition to a new Bearing Tree that was **R25E R26E** documeted in U.S.F.S. Corner cards of Weaver in 1981. The mound is 173.5 feet East of my set monument and, by testimony of the adjacent landowner, was previously a fence corner and Weaver Record Distance/Bearing C.S.#C-434-K | Forest Road #22 2 5/8" Brass Cap, Section Corner, Sec. 1-6, 7S 25-26E, PLS 346, 1979, ROS T7S, R26E, Sec's 8 & 9 1/4 30 possession line accepted as the Quarter Corner. Weaver states on the corner card that the mound and fence do not match the original notes by York. I agree with Weaver's assessment and 2 5/8" Brass Cap, Section Corner, Sec. 36-31, 6S 25E-26E, PLS 1679, 1981, C.S.#C-435-K Harris Record Distance/Bearing therefore did not hold that as evidence of the location of the Original Corner set by York. PLS 2431 <sup>2</sup> 5/8" Brass Cap, North Quarter Corner, Sec. 6, 7S 26E, PLS 1679, 1981, C.S.#C-435-K Portions of the Park Boundary that are not a GLO line are the State Highway No. 207 to the west and the County and Forest Roads on the north. I also found and monumented some interior S 88°52'23" W 2670.22' Wells Record Distance/Bearing C.S.#1616-C 2 5/8" Brass Cap, South Quarter Corner, Sec. 31, 6S 26E, PLS 1679, 1980, C.S.#C-435-K lines when I found very good evidence of the original survey corners by Sanderson. This original evidence is currently over 130 years old and I thought it important to perpetuate as much of it as possible into the future. This survey, along with the associated monumentation sheets for each corner that I set, depict the evidence found and the justification for the location of the Wells Record Distance/Bearing C.S.#C-253-K (40.00 CH N 89°38' W 40.00 CH 2 5/8" Brass Cap, Section Corner, Sec. 5-6, 7S 26E, PLS 1679, 1980, C.S.#C-435-K reestablished corners. This survey was performed with a Trimble 4800/5800 RTK GPS Total Station with a minimum of 0.04' resolution achieved at each receiver location prior to recording 2 5/8" Brass Cap, Section Corner, Sec. 31-32, 6S 26E, PLS 1679, 1980, C.S.#C-435-K Munro Record Distance/Bearing C.S. D-846-K along with a Nikon 530 Total Station where GPS receivers were not practical. The Basis of Bearing was the opposite south corners of Section 35 as shown. 3 1/4" Alum. Cap, North Quarter Corner, Sec. 5, 7S 26E, PLS 49865, 2008, C.S.#2013-1687D This survey was completed according to the BLM Manual of Surveying Instructions 2009. For the Corners Set in this survey, Caps marked 2013 set in August 2013, Caps marked 2014 set in Delano Record Distance/Bearing C.S. 2013-1687D March 2014, see Corner Certificates filed separately. Final completion and filing of survey, March of 2014. (Set New Cap Based on Found Original Evidence for Location of Section Corner) South Quarter Corner, Sec. 32, 6S 26E, Found 2 Original BT's, Set Cap @ Record GLO Distances from BT's 3 1/4" Alum.
