**NARRATIVE:** This survey was performed at the request of Gary Hyde to delineate the tracts of land shown hereon. A search was made of the available records pertaining to this survey. Field measurements were made to locate existing monuments. New monuments were set in accordance with the evidence found as shown hereon. This survey involved retracing the lines of survey no. 669, which I performed in March 1981, and then establishing two division lines to create three tracts as shown. I found no unusual conditions except as noted concerning the monuments on the west side of this tract.
