Description of corner evidence found:

NONE

As shown on the map of survey (number 792) there is approximately 200 feet excessive distance between section corners East and West, and also a North-South shift of approximately 140 feet. This makes a very large search area. The search areas East and West 2640 feet from respective section corners have both been worked by bulldozers. The search area from the West is in a road, and the search area from the East has been worked to remove Junipers. I was unable to locate this corner and am forced to proportion.

Description of monument and accessories I established to perpetuate the

original location of this corner: At proportionate distance, I set a 2 1/2" x 30" aluminum pipe with aluminum cap marked as shown, 20 inches in the ground, from which:

New BTs

A 6 inch diameter Juniper bears South 27° West, 9.1 feet, marked 1/4 S27 BT
A 12 inch diameter P.Pine bears North 74° West, 75.3 feet marked 1/4 S22 BT

Raised mound of stone around new monument

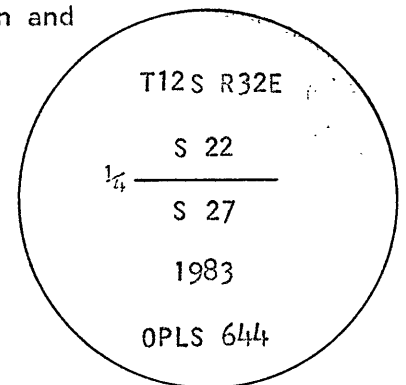

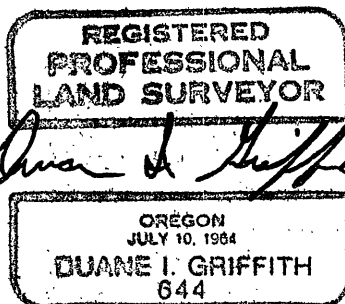

Set steel fence posts approximately 5 feet West with 54-2 sign and approximately 5 feet East with 54-2 and 54-4 signs attached

Attached 54-4 signs and bearing tree tags to and painted a 6 inch red band around all bearing trees

Corner set October 6, 1983

Witnesses: Greg Blackman and Rick Robinson

See survey number 792

I used a steel tape and magnetic compass in the establishment of these accessories. I used 17 1/2° East magnetic declination, and the distances to the new BTs are to the center of the tree. I attached a brass washer marked OPLS 644 by the BT blaze of the new bearing trees.
